Bonus: structured (whole filters) vs unstructured pruning, against the actual sparsity
Validation accuracy
Accuracy (%)
Sparsity ratio (%)
kept: 20% sparsity
67.76% val acc
Validation loss
Cross-entropy loss
Sparsity ratio (%)
Unstructured global, no re-training (Ex. 3)
Unstructured global + re-training (Ex. 4)
Structured (filters), no re-training
Structured (filters) + re-training
Unpruned baseline (68.67%)
Chance level (1%)
